

Paperless health records anywhere at your fingertips.

Integrated with online appointments, practice management,
claims management (DHA / MOH), local regulatory statistical reports,
eRx, business intelligence, IoT medical devices & AI.

A Patient Centric Robust IT Platform.

Unite provides a simple and user-friendly software for the doctor to record the observations, medications, vaccinations and procedures to create an effective Electronic Health Record.

EHR can be shared across doctors within the same or different clinics for a holistic diagnosis of the root cause.

Here's what you get at a glance
